

Training Services

ACE has a pool of certified trainers to conduct certification courses, sales and technical training. In addition, we are also equipped to arrange customized end users training sessions in our well-facilitated training room or arrange on site sessions for comprehensive hands on knowledge.

Professional Services

In addition to the training services, we have built a team of well-qualified engineers to provide a comprehensive range of professional services, from technical/solutions consultancy and design, to proof of concept and turn-key development. Leveraging on our competencies, you can be assured of quality and reliable deliverables.

Partners

In ACE, we believe in partnership. As the vital link in the technology value chain, we connect brand owners with their potential buyers through our nationwide reseller network and resources.

We offer more than just distribution – we add value in the area of logistics, marketing and PR programs, training and technical services so that you can reach your audiences quickly and efficiently.

For resellers, ACE offers the most comprehensive range of innovative and market leading products, unrivalled support packages and tailored services to suit your business needs.
