

FOSCAM

FI9821W

Wireless IP Camera is Foscam's 2nd Generation HD 720p Megapixel IP camera.

It adopts a high performance media processor and high speed video protocol processor making it capable of H.264 video compression for extremely smooth high definition video transmission, increased FPS and minimal bandwidth consumption. In addition, due to the small file sizes produced by H.264 video compression it has the ability to save tremendous hard drive space when doing video recording. Furthermore, the FI9821W also features a built-in DVR via on-board SD Card slot for direct recording on the camera itself up to 32GB.

The FI9821W features high quality video and audio, h.264 video compression, built-in SD card slot, wifi-N capability, pan/tilt, remote internet viewing, motion detection, night-vision as well as a built in network video recording system. In addition, the Free Foscam DDNS Server Embedded allows smartphone (iOS, Android, Windows Mobile & Blackberry) as well as viewable over the internet network using the standard Safari, Opera, Firefox, Chrome browser (no app necessary). The camera functions well as an iOS baby monitor or as part of a home or office security system with remote internet monitoring ability.

- 720P (1280X720) Display Resolution
